

Frequently Asked Questions

When is the best time to schedule my newborn session?

All newborn sessions are pre-booked during 7-8 months of your maternity or after your maternity session. However, if you didn't book your maternity session with me, I recommend you book before your child is born. My schedule is filled quickly, once you are on our calendar, we can guarantee your At Home newborn session.

What should I do if I have my baby?

If you have your baby early, or already scheduled a newborn session please call me to notify me that you had your baby. This way we can confirm a specific date and time for your at home newborn session.

How do I select my session date?

Your due date is your session date.

I am having trouble breastfeeding?

You should already produce milk once your child is born. If you are having trouble breastfeeding, be sure to talk to your nurse about your breastfeeding questions and concerns. The more the baby latches on, the more your body will make.

How much do I pay for newborn portraits?

The session fee is \$190 (this doesn't include any prints) and an additional cost of your preferred package and products. Prices may vary depending on each client. I also have a payment plan.
